

ECO SOLUTIONS (PTY) LTD
COMPANY PROFILE
**"Powering Lesotho's Sustainable
Future"**

ECO SOLUTIONS

Technology Simplified

1. EXECUTIVE SUMMARY

Eco Solutions (Pty) Ltd is a 100% Basotho-owned and managed company established in 2016 and formally registered under the Business Licensing and Registration Act of 2019 (Registration No. A2022/1224). The company operates across three strategic sectors in the Kingdom of Lesotho:

- **Information and Communication Technology (ICT) ,**
- **Renewable/Green Energy, and**
- **Construction.**

Eco Solutions is a **licensed electricity super dealer for the Lesotho Electricity Company (LEC)** , a status the company has held for over 10 years. This long-standing relationship with the national utility demonstrates the company's reliability, technical competence, and regulatory compliance.

Most significantly, Eco Solutions owns and controls **70 hectares of land** in Lesotho, comprising two prime sites of **40 hectares and 30 hectares** respectively. These lands are earmarked for the development of a **hybrid solar and wind energy farm** with a target capacity of **50MW**. The company is actively seeking a strategic partner to co-develop this project, with the generated electricity to be **resold to LEC, and supplied directly to the public, hospitals, and mining operations across Lesotho.**

This is Eco Solutions' strongest proposition: **a licensed utility partner, prime land, and a guaranteed market for clean energy.**

2. COMPANY OVERVIEW

Eco Solutions (Pty) Ltd has grown from a small construction and technology services provider into one of Lesotho's most trusted resellers and distributors of ICT and renewable energy products. The company serves individual households, businesses, schools, government institutions, financial institutions, hospitals, and mining companies across all ten districts of Lesotho.

Eco Solutions is driven by a mission to make modern technology and clean, affordable energy accessible to every household, school, hospital, and enterprise in Lesotho. The company believes that affordable clean energy and digital inclusion are essential pillars of a healthy economy and a prosperous society.

3. COMPANY HISTORY AND MILESTONES

Year	Milestone
2016	Eco Solutions founded in Maseru as a construction and general services company.
2016	Awarded Licensed Electricity Super Dealer status by the Lesotho Electricity Company (LEC).
2018	Expanded into ICT retail and distribution; began supplying laptops and printers to institutional clients.
2019	Secured first major institutional contract with the Lesotho Teachers Trade Union (LTTU) .
2020	Commenced solar panel sales and installation for households and small businesses.
2021	Expanded renewable energy portfolio to include gas geysers and related green products.
2022	Formal company registration under the Business Licensing and Registration Act of 2019 (Reg. No. A2022/1224).
2023	Surpassed 4,500 laptops resold and distributed through the LTTU partnership.
2024	Surpassed 1,400 solar panel installations and 300 gas geyser installations across Lesotho.
2025	Secured tax clearance certificates for Construction and Waste Collection.
2026	Positioned to develop a 50MW+ hybrid solar and wind farm on company-owned land.

4. CORE BUSINESS SECTORS

4.1 Licensed Electricity Super Dealer – Lesotho Electricity Company (LEC)

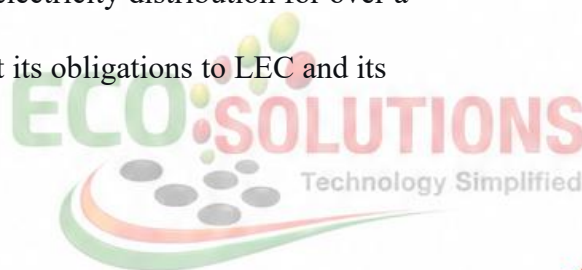

This is Eco Solutions' strongest and most distinguishing credential.

Eco Solutions has been a **licensed electricity super dealer for the Lesotho Electricity Company (LEC) for over 10 years**. This status is granted only to companies that meet the highest standards of technical competence, financial probity, and regulatory compliance. As a super dealer, Eco Solutions is authorised to:

- Purchase electricity from LEC in bulk
- Resell electricity to consumers, businesses, and institutions

This long-standing relationship with Lesotho's national utility demonstrates:

- **Trust:** LEC has entrusted Eco Solutions with electricity distribution for over a decade.
- **Reliability:** The company has consistently met its obligations to LEC and its customers.

- **Market Access:** Eco Solutions has established channels to resell electricity to the public, hospitals, mines, and other large consumers.
- **Regulatory Standing:** The company is fully compliant with all LEC requirements.

This super dealer license, combined with the company's landholdings, creates a unique and powerful proposition for any partner seeking to develop and monetise renewable energy projects in Lesotho.

4.2 Land Assets for Hybrid Solar and Wind Farm Development

Eco Solutions owns 70 hectares of land in Lesotho, comprising two sites:

Site	Size	Status	Intended Use
Site A	40 hectares	Available for development	Hybrid solar and wind farm
Site B	30 hectares	Available for development	Hybrid solar and wind farm
Total	70 hectares	Ready for partnership	50MW renewable energy project

These lands are strategically located and have been assessed for their suitability for renewable energy development. With 70 hectares available, Eco Solutions is positioned to develop a **hybrid solar and wind farm with a capacity of 50MW or more**, depending on the final technology mix and configuration.

Why This Matters:

- Land is the Most Critical Asset:** In renewable energy development, securing suitable land is often the most challenging and time-consuming step. Eco Solutions has already acquired this land.
- Hybrid Advantage:** By combining solar and wind, the project can achieve higher capacity factors, more stable generation profiles, and better alignment with LEC's grid requirements.
- Scalability:** The 70-hectare footprint provides ample space for phased development, allowing for expansion as demand grows.
- Guaranteed Market:** The electricity generated can be sold to LEC under a Power Purchase Agreement (PPA), and directly to hospitals, mines, and the public through Eco Solutions' established distribution channels.
- Partnership Opportunity:**

Eco Solutions is seeking a strategic partner to:

- Co-develop the 50MW+ hybrid solar and wind farm
- Provide technical expertise, equipment, and financing
- Share in the equity and profits of the project
- Establish a long-term, mutually beneficial relationship

The generated electricity will be:

- **Resold to LEC** under a long-term Power Purchase Agreement (PPA)
- **Supplied directly to the public**, hospitals, and mines in Lesotho through Eco Solutions' distribution network

4.3 Information and Communication Technology (ICT)

Eco Solutions is the **first company in Lesotho** to have secured an official contract with the **Lesotho Teachers Trade Union (LTTU)** for the resale and distribution of laptops, mobile data, and printers to teachers across the country. This landmark project was directly aligned with the **Ministry of Education's Vision 2030**.

To date, Eco Solutions has **resold and distributed over 4,500 laptops** and counting. The company has also partnered with **Boliba Savings & Credit Cooperative Bank** and **First National Bank (FNB) Lesotho** to provide financing options for teachers.

ICT Products and Services:

- a. Laptops, desktop computers, and tablets
- b. Printers, scanners, and photocopiers
- c. Mobile data packages and connectivity solutions
- d. Computer programming and consultancy services
- e. Data processing, hosting, and web portal services

4.4 Renewable and Green Energy (Current Operations)

Eco Solutions buys and resells **solar panels, inverters, lithium batteries, and other renewable energy products**, and provides professional installation services.

Renewable Energy Track Record:

- **Over 1,400 solar panels installed** in households across Lesotho
- **Over 300 gas geysers installed**
- **Ongoing expansion into commercial and industrial solar solutions**
- **Licensed electricity super dealer for LEC for over 10 years**

4.5 Construction and Infrastructure

Eco Solutions has extensive experience in construction, civil engineering, and infrastructure development. The company holds a valid **Tax Clearance Certificate for Construction of Buildings**.

Construction Services:

- a. Construction of buildings, roads, railways, and utility projects
- b. Other civil engineering projects
- c. Demolition and site preparation
- d. Electrical installation
- e. Plumbing, heat, and air-conditioning installation
- f. Building completion and finishing

4.6 Waste Management and Environmental Services

Eco Solutions holds a valid **Tax Clearance Certificate for Waste Collection**. The company provides waste collection and materials recovery services.

5. ACHIEVEMENTS AND TRACK RECORD

Achievement	Impact
LEC Licensed Super Dealer for 10+ years	Trusted partner of Lesotho's national utility
70 hectares of land owned	Ready for 50MW+ hybrid solar and wind farm
4,500+ laptops distributed	Empowering teachers and students across Lesotho
1,400+ solar panels installed	Bringing clean energy to households nationwide
300+ gas geysers installed	Reducing electricity demand and household costs
Official partnership with LTTU	First company in Lesotho to secure this contract
Partnerships with FNB Lesotho and Boliba Bank	Making technology and energy affordable

6. MANAGEMENT TEAM

6.1 Glennold Khauli Ramakatane – Chief Executive Officer and Founder

Glennold Khauli Ramakatane is the founder and Chief Executive Officer of Eco Solutions (Pty) Ltd. He established the company in 2016 with a vision to bridge the gap between modern technology and the everyday needs of Basotho households and institutions.

Under his leadership, Eco Solutions has grown from a small startup into a multi-sector enterprise with a proven track record in ICT, renewable energy, and construction. Glennold has been instrumental in securing landmark partnerships with the **Lesotho Teachers Trade Union, First National Bank Lesotho, and Boliba Savings & Credit Cooperative Bank**, as well as securing the **LEC Super Dealer license** and acquiring the **70 hectares of land** for renewable energy development.

His vision for Eco Solutions extends beyond Lesotho's borders: to establish the Kingdom as a regional hub for renewable energy manufacturing and to create sustainable, green jobs for the next generation of Basotho professionals.

6.2 Rajase Joseph Mnyele – Project Manager

Rajase Joseph Mnyele serves as the Project Manager at Eco Solutions, overseeing the planning, execution, and delivery of the company's diverse portfolio of projects. With extensive experience in project management and community engagement, Rajase ensures that every project is delivered on time, within budget, and to the highest quality standards. He has been a driving force behind the successful rollout of the **LTTU laptop distribution project** (4,500+ units) and the **solar panel installation programme** (1,400+ installations).

He is now actively involved in the planning and coordination of the **50MW+ hybrid solar and wind farm project**, working closely with the CEO to secure partners and prepare the sites for development.

6.3 Management Structure

Position	Name
Chief Executive Officer / Founder	Glennold Khauli Ramakatane
Project Manager	Rajase Joseph Mnyele
Technical Team	Qualified electricians, solar technicians, and construction professionals
Finance & Administration	Dedicated team managing accounts, procurement, and compliance
Sales & Distribution	Nationwide network of agents and resellers

7. WHY PARTNER WITH ECO SOLUTIONS?

Eco Solutions is **ready, willing, and capable** of partnering with international investors, manufacturers, and technology providers. Here is why:

Strongest Points:

- Licensed LEC Super Dealer for 10+ Years:** A guaranteed channel to market electricity to LEC, the public, hospitals, and mines.
- 70 Hectares of Land Owned:** Prime sites ready for a 50MW+ hybrid solar and wind farm.
- Guaranteed Market:** Electricity can be sold to LEC under a PPA and directly to hospitals, mines, and the public.
- Proven Track Record:** 4,500+ laptops distributed, 1,400+ solar panels installed, 300+ gas geysers installed.
- Legal and Regulatory Compliance:** Fully registered, tax compliant, and licensed.
- Strong Local Networks:** Partnerships with trade unions, banks, and government institutions.
- Vision for Growth:** Seeking partners to establish manufacturing and large-scale renewable energy projects.

8. PARTNERSHIP OPPORTUNITIES

Eco Solutions invites expressions of interest from:

Manufacturers of Renewable Energy Products:

- Solar panels, inverters, lithium batteries
- Assembly and manufacturing partners for local production in Lesotho
- Investors and Equity Partners:**
- Joint venture partners for the 50MW+ hybrid solar and wind farm
- Investment in manufacturing and assembly facilities
- Financing partners for large-scale renewable energy projects

EPC and Construction Partners:

- Large-scale infrastructure and civil engineering firms
- Electrical and high-voltage specialists
- Project management and engineering consultants

Prospective Off-Takers:

- LEC (Power Purchase Agreement)
- Hospitals, mines, and large commercial consumers
- Government institutions and public sector entities

9. CONTACT INFORMATION

Main Office:

Office 7, Speedy Complex
Opposite Main Circle
Maseru, Lesotho

Second Office:

10. VISION, MISSION, AND VALUES

Our Vision:

To be Lesotho's leading provider of integrated technology, renewable energy, and construction solutions—empowering every household, school, hospital, and enterprise to thrive in a sustainable, connected future.

Our Mission:

To deliver quality, innovative products and services across ICT, renewable energy, and construction, ensuring access to reliable, sustainable energy and modern technology for everyone.

Our Values:

- **Integrity:** We conduct our business with honesty, transparency, and accountability.
- **Excellence:** We strive for the highest standards in every project we undertake.
- **Innovation:** We embrace new technologies and creative solutions.
- **Community:** We are committed to empowering Basotho communities.
- **Sustainability:** We prioritize environmentally responsible practices.

11. LOOKING AHEAD

Eco Solutions stands at a pivotal moment. With the **LEC Super Dealer license**, **70 hectares of land**, and a **proven track record**, the company is uniquely positioned to develop Lesotho's first large-scale hybrid solar and wind farm.

This project will:

Generate clean, affordable electricity for LEC, hospitals, mines, and the public

Create jobs and transfer skills to Basotho professionals

Reduce Lesotho's reliance on imported electricity

Position the Kingdom as a leader in renewable energy in Southern Africa

Eco Solutions is not just seeking a business partner; it is seeking a partner to **build Lesotho's green economy together**.

"Together, we can power Lesotho's sustainable future."
